

MOBILITY DELIVERED

Thank you for your interest in Personal Positioning Technologies. We have exciting new products available!

Check out our new Power Shop Stool, pictured left below. Capable of lowering users weighing up to 300lb (136kg) down to 6" off the floor, and back up to 26" at the touch of a button. Powered by removable, rechargeable Milwaukee batteries, this is the perfect tool for working down low, around objects.

Need to lay flat? You'll love our Power Shop Chair, lowers to just 4 " from the ground, sitting erect, reclined, or flat! Powered by two 28 volt Milwaukee Batteries, the Power Shop Chair lowers a 300lb user all the way down and back up 200 times on a single charge. Adjustable head and backrests ensure you're always in the proper position and protects you from sprains, strains, and cumulative trauma. A proven performer with years of trouble free service in industrial environments. Pictured center below.

Our newest offering is the Mobile Shop Chair. All the flexibility and quality of the Power Shop Chair—and it drives! Don't let mobility issues keep you from doing what you want. Check out the new Mobile Shop Chair, pictured right below.
